ShopMate Store Guide

Store overview

ShopMate is a demo online store. The live product catalog is the source of truth for current product names, SKUs, prices, descriptions, categories, and stock. This guide does not contain live inventory or prices.

Ordering and confirmation

An order is created only after the customer reviews the exact products, quantities, total, customer name, and complete delivery address and explicitly confirms. A successful order returns an order reference beginning with ORD-. Keep this reference for tracking.

Payments

This demo does not process real payments and does not collect payment-card details. Payment methods and a payment gateway are not configured in this demo.

Shipping and delivery

The demo stores the delivery address on the order but is not connected to a courier. It does not provide live shipment tracking or verified delivery estimates. Order tracking reports the status stored by this application.

Sample returns and refunds policy

- **Return window:** Customers may request a return within 7 calendar days after the item is marked delivered.
- **Eligibility:** The item should be unused, undamaged, and returned with its original packaging, accessories, and proof of purchase. Items damaged through misuse are not eligible under this sample policy.
- **Wrong or damaged item:** Report an incorrect or visibly damaged item within 48 hours of delivery. Include the order reference and clear photos. The store team would review the request before approving a return or replacement.
- **Non-returnable items:** Personalized items, digital goods, and opened hygiene-sensitive items are excluded unless the item arrived damaged or incorrect.
- **How to request a return:** Contact demo support at help@shopmate.demo with the order reference, reason, and relevant photos. Do not send payment-card details.
- **Refund timing:** After an approved return is received and inspected, a refund would typically be initiated within 5–7 business days. The time for funds to appear depends on the original payment provider. This demo does not process real payments or refunds.
- **Cancellation:** A customer may request cancellation before an order is marked dispatched. Cancellation is not guaranteed after dispatch in this demo.
- **Return shipping:** The demo has no real courier or return-shipping service configured. Support must confirm the return method before anything is shipped.

DEMO NOTICE: These return and refund rules are illustrative sample rules for this portfolio project, not a real merchant commitment. Replace them with the merchant's approved policy before production use.

Privacy and security

The store should collect only the customer information needed to create an order. Customer order information should not be revealed to other customers. Public production deployment requires authentication and HTTPS.

Assistant scope

ShopMate helps customers discover products, check live catalog details, place confirmed demo orders, track order references, and answer questions using approved store documents. When a policy detail is not present in the indexed documents, the assistant should say it cannot verify the detail instead of inventing an answer.
